LOCATION
In the wood of a tree
(START: Carl begins here)

LOCATION
CO_2 in the air

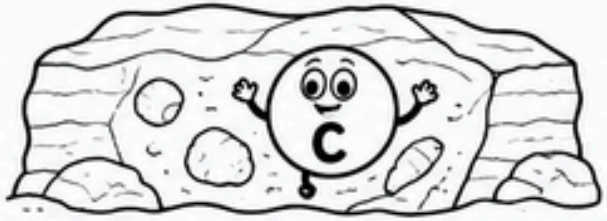

LOCATION
Dissolved in ocean water

LOCATION
In the calcium carbonate shell of a reef organism

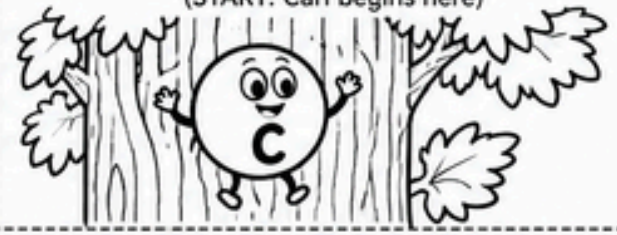

LOCATION
In the limestone of Carlsbad Caverns
(END: where Carl ends up)

PROCESS
respiration
(living things release CO_2 as they use energy)

(END: where Carl ends up)

PROCESS
respiration
(living things release CO_2 as they use energy)

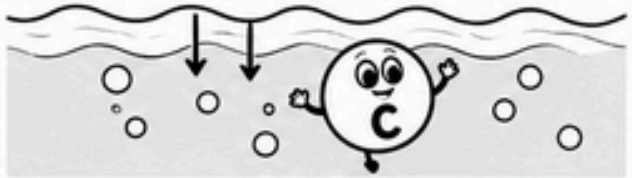

PROCESS
decay
(dead plants and animals break down) →

PROCESS
photosynthesis
(plants take in CO_2 to make food) →

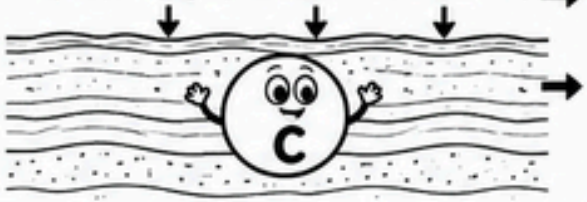

PROCESS
ocean absorbs CO_2
(CO_2 from the air mixes into ocean water) →

PROCESS
shell building
(sea animals use carbon to make shells) →

PROCESS
burial and cementation
(layers pile up, get pressed, and harden into rock) →

PROCESS
volcanism
(magma and gases escape from inside Earth) →
