EARTH SPHERES
HEXAGON CHALLENGE

Can you figure out how these pictures are connected?

YOUR TASK

1. Look carefully at every picture.
2. Find pictures you think belong together.
3. Arrange the hexagons into meaningful groups. Each hexagon should be touching another hexagon.
4. Be ready to explain WHY you arranged them that way.

RULES

Be able to defend your choices.

Everyone in your group needs to participate.

You may move the hexagons as many times you need to.

Talk through your ideas with your group.

A picture might seem like it could fit in more than one place.

THINK ABOUT: WHAT DOES THESE PICTURES HAVE IN COMMON?

STUCK? LOOK CLOSER

WHAT DO WE NOTICE?

What do these pictures have in common?

COULD IT MOVE?

Could this picture fit somewhere else?

WHAT IS DIFFERENT?

Why might one picture NOT belong with the others?

LOOK AT EVERYTHING!

Even small details may be important.

ASK YOURSELF THESE QUESTIONS!

GALLERY WALK

As you visit other groups, look for:

Similarties to your arrangement.

Differences in how pictures were grouped.

Why might one picture NOT belong with the others?

Pictures that other groups placed differently.

LET'S COMPARE

What pattern did you notice?

Were some pictures easier to group than others? Why?

Could some pictures belong in more than one group?

Did you notice anything else that helped organize the pictures?

How many categories do you think there are?

What do you think the categories might represent?

THE 5 EARTH SPHERES

GEOSPHERE

Rocks, minerals, soil, landforms, and Earth's internal processes

HYDROSPHERE

All of Earth's water in any form

ATMOSPHERE

The gases that surround Earth

BIOSPHERE

All living things

CRYOSPHERE

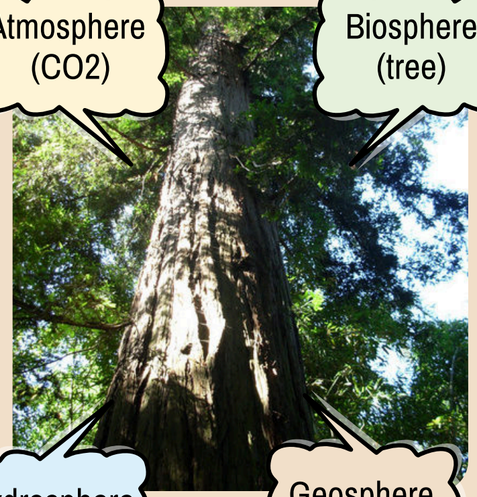

All frozen water on Earth

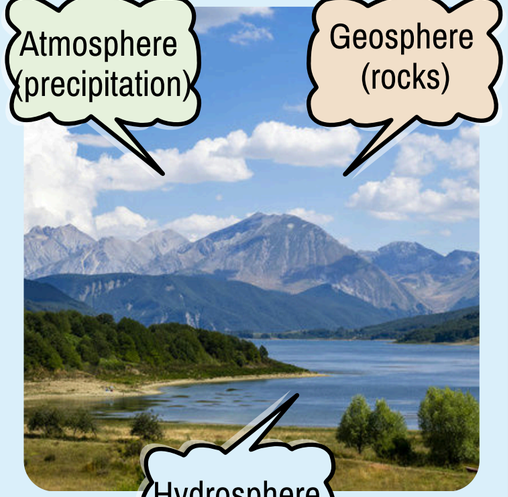

THE SPHERES INTERACT

A CHANGE IN ONE SPHERE CAN AFFECT ONE OR MORE OF THE OTHER SPHERES. EARTH'S SPHERES ARE ALWAYS CONNECTED

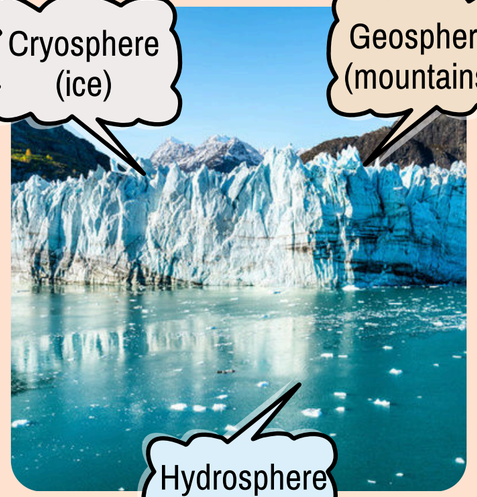

A TREE

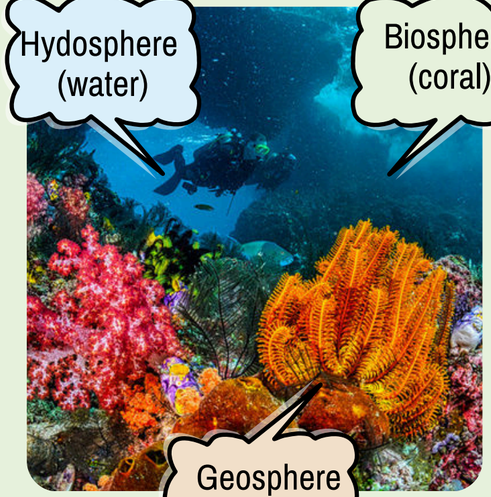

RAIN AND ROCKS

GLACIERS

A CORAL REEF

ALL 5 SPHERES WORK TOGETHER TO MAKE EARTH THE DYNAMIC SYSTEM THAT IT IS
