Name:_____ Period:___

The YEARLONG Earth Science Explorer Challenge (R)

Earth Science is happening all around you! Throughout the school year, your goal is to find and photograph as many examples from the scavenger hunt list as possible.

Step 1: Create Your Science Explorer Rock

Paint and decorate a small rock that will become your Earth Science explorer. Give your rock a name!
Your rock must be clearly visible in EVERY photo you submit. This is how you show that the photo is your own.

Step 2: Start Exploring!

Use the scavenger hunt checklist to look for examples of Earth and Space Science in your everyday life. You may find them at home, around your neighborhood, while traveling, at local WNY locations, or in the sky!
Some items can only be found at certain times of the year, so keep the scavenger hunt in mind all year.

Step 3: Take Your Photos

When you find an item from the list:

1. Take a real photo of the item or event.
2. Make sure your Science Explorer Rock is clearly visible.
3. Make sure the Earth Science concept is clearly shown.
4. If proof is required, include it in the photo, such as a visible date, sign, or map.
5. One photo = one scavenger hunt item.

Step 4: Add It to Your Google Slides

Create a Google Slides presentation to keep track of your finds. For each item, create ONE slide that includes:

- **Title:** Name of the scavenger hunt item
- **Photo:** Your original photo with your rock clearly visible
- **Caption:** 1-2 sentences explaining what is shown in the photo and how it connects to Earth Science

Important Rules

- Your Science Explorer Rock must appear in every photo.
- Photos should be taken by you, not downloaded from the internet.
- Follow any special proof requirements listed next to an item.
- **One photo = one checkmark.** Each item on the scavenger hunt can only be completed once. Multiple photos of the same item or event will not count as additional checkmarks.
- **Be safe!** Do not enter private property, dangerous areas, bodies of water, roads, or other unsafe locations just to get a picture.
- You do not need to complete the scavenger hunt in order. Find items whenever you come across them!

Regents Quarterly Requirements

- Complete at least 5 slides per quarter. You will submit this on Canvas.
- You may complete an additional 5 slides for extra "Starbucks."
- At the end of each quarter, we will have a presentation day where you can share some of your best finds. It will not be required. Presenting will earn you extra "Starbucks".
- At the end of the year, the student with the most completed photos will earn extra credit toward their final average!
