LOCATION
In the wood of a tree
(START: Carl begins here)

PROCESS
respiration
(living things release CO_2 as they use energy)

PROCESS
decay
(dead plants and animals break down) →

LOCATION
CO_2 in the air

PROCESS
ocean absorbs CO_2
(CO_2 from the air mixes into ocean water) →

LOCATION
Dissolved in ocean water

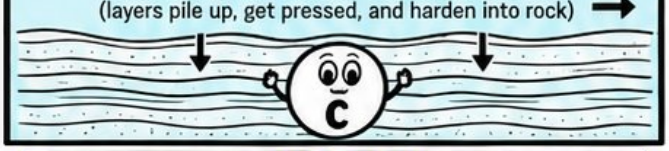

PROCESS
shell building
(sea animals use carbon to make shells) →

LOCATION
In the calcium carbonate shell of a reef organism

PROCESS
burial and cementation
(layers pile up, get pressed, and harden into rock) →

LOCATION
In the limestone of Carlsbad Caverns
(END: where Carl ends up)
